

## KS2 mathematics work sheet: one- and two-step addition and subtraction

1. There were 45 bricks on one pallet, and 32 bricks on another pallet. 17 bricks were taken by builders to use on a home.

How many bricks were left on the pallets?

2. When working on a building site, people use a lot of pencils. A box of pencils holds 18 pencils when it's full. There are 11 full boxes of pencils. The builders take 28 pencils to be used while they work.

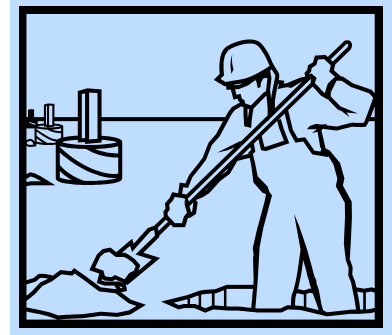

How many pencils are left?

3. There are 42 bricklayers, 37 carpenters and 19 electricians on the building site.

How many workers are there in total on the building site?

4. There are currently only 73 workers on the building site and 19 workers come to join them. 13 workers then go off the site on their lunch break.

How many workers are there left on the building site?

5. The workers build 52 houses on one part of the site and 36 houses on another part of the site. 43 houses have already been bought by families.

How many have not been bought yet?

6. 90 children were visiting the building site on a school trip. Half the children went to talk to the builders. 12 more children went to join them.

How many children were talking to the builders?
